**FOR IMMEDIATE RELEASE: 13 July 2007**

### **Magellan BioScience Group, Inc. debuts its innovative and interactive forum: marineNaturalproducts.com™**

(Tampa, FL) Magellan BioScience Group, Inc. unveiled a new tool for researchers in Marine Natural Products in the form of a new website, [www.marineNaturalproducts.com](http://www.marineNaturalproducts.com)™, a forum to explore, promote and discuss current issues, innovations and technologies for students, researchers and organizations involved in marine natural products research. Users will be able to participate simply by logging on and registering at [www.marineNaturalproducts.com](http://www.marineNaturalproducts.com).

“The launching of the [www.marineNaturalproducts.com](http://www.marineNaturalproducts.com) website will create a conduit for the exchange of innovative concepts and ideas between researchers in marine natural products,” said Dr. John M. Cronan Jr. Magellan’s Vice President and Chief Scientific Officer. “The ability to share concepts and ideas for researchers in natural product discovery from the marine environment will assist researchers around the globe in sharing useful information.”

The site will not only include a message board for the exchange of ideas, but it will also include a calendar where users can get a glimpse of up-coming scientific meetings and events of interest around the globe. The site will include links to research groups and graduate school programs. Users will be able to share photos of collecting expeditions and/or research groups. The site will also include an open position link where users can post or find jobs in academia as well as industry.

**About Magellan BioScience Group.** Magellan BioScience Group, Inc, is a privately held innovative biotechnology company focused on the discovery of novel chemical compounds from the marine environment. Magellan uses its integrated platform technologies to identify new biologically-active compounds from the marine environment. The company believes that its library of marine microbes will be the next source of drug discovery for the pharmaceutical industry. Magellan aims to develop and optimize drug candidates to treat cancer, diseases of the central nervous system, infectious diseases, and inflammation. For additional information about the company, please refer to the company’s web site at [www.magellanbioscience.com](http://www.magellanbioscience.com).
